

SUBJECT INDEX

A

- Acne vulgaris*, therapy of, with modified liver extract, 119
- Allergy, in interstitial keratitis, 158
- Anesthetic, procaine, cutaneous hypersensitivity to, 53
- Appendages, skin, anatomy and pathology of, 175

B

- Bromoderma, blood plasma bromide levels in, 331

C

- Chemical structure, of local anesthetics, and correlation to hypersensitivity, 53
- Chemical substances, to be employed in patch-testing, 93
- simple, acquired specific sensitivity to, 25

D

- Dandruff, and seborrhea, 31
- Dermatitis, atopic, and histaminase therapy, 301
- Dinitrochlorobenzene, 2-4, sensitization, of guinea pigs, 81

E

- Epidermis, human, mitotic rhythm in, 289
- plantar and palmar, mitotic index of, 313
- Estrogenic substances, influence of, on skin, 15

F

- Flora, of face and scalp, 31
- Fungus, lipophylic, 187

H

- Histaminase, in treatment of urticaria and atopic dermatitis, 301
- Horse serum, sensitivity, in guinea pigs, 84
- Hypersensitivity, cutaneous (eczematous, contact-type), to procaine anesthetics, 53

I

- Infectivity, of saliva, in early syphilis, 327

K

- Keratitis, interstitial, 157
- Ketohydroxyestrin, absorption of, through skin, 15

L

- Lipocaic, experimental use of, in treatment of psoriasis, 219
- Liver, extract, in therapy of *Acne vulgaris*, 205
- Lupus erythematosus*, pathology of, 000
- Lymphogranuloma inguinale*, skin test in, 119

M

- Mitotic index, of palmar and plantar epidermis, in response to stimulation, 313
- Mitotic rhythm, in human epidermis, 289

N

- Nails and nail changes, 361
- Nail lacquers, ingredients of, 361
- effects of, 365

P

- Patch-testing, list of substances and concentrations for, 93

- Patch-testing studies with various local anesthetics, 53
Pemphigus vulgaris, etiology of, 1
pH of skin surface, technic for measurement, 67
 in adults with no apparent skin lesions, 75
 in children with no apparent skin lesions, 231
 in adult females with no apparent skin lesions, 235
Photoallergy, to sulfanilamide, 43
Photosensitivity, primary, cutaneous, to sulfanilamide, 43
Pityrosporum ovale, cultural characteristics of, 187
Poison ivy, sensitization, in human beings, 81
 sensitivity, 143
Psoriasis, therapy of, with lipocaine, 219
- R
- Ragweed, sensitization of guinea pigs, 81
Report of the Executive and Scientific Sessions of The Society for Investigative Dermatology, 151
- S
- Seborrhea, and dandruff, 31
Sensitivity, to poison ivy, 143
Sensitivity, skin, of guinea pigs, to turpentine, 281
Sensitization, eczematous, individual differences in susceptibility to, with simple chemicals, 25
Sensitization, studies, cutaneous, 81
- Serologic reactions, positive, in rabbits, 125
Skin, appendages, anatomy and pathology of, 175
 human, intracutaneous tuberculin reaction in, 243
 human, mitotic rhythm in, 289
 influence of estrogenic substances on, 15
 palmar and plantar, mitotic index of, 313
 reactions, tobacco, 257
 surface, pH of, 67, 75, 231, 235
 test, in *Lymphogranuloma inguinale*, 119
Spirocheta pallida, in cornea of patients with interstitial keratitis, 157
Sulfanilamide, photoallergic reaction to, 43
Syphilis, early, infectivity of saliva in, 327
- T
- Thermophore, clinical use in interstitial keratitis, 166
Tobacco, skin reactions, 257
Trauma, relation of, in interstitial keratitis, 162
Treponema pallida, inoculation with, 125
Tuberculin reaction, intracutaneous, in human skin, 243
Turpentine, skin sensitivity to, in guinea pigs, 281
- U
- Urticaria, and histaminase therapy, 301
